

TETRAFLUOROETHYLENE RESIN COMPOSITION

Patent number: JP11021407
Publication date: 1999-01-26
Inventor: SUZUKI TOSHINORI
Applicant: NOK CORP
Classification:
- **International:** C08L27/18; C08K3/04
- **European:**
Application number: JP19970187864 19970627
Priority number(s):

Abstract of JP11021407

PROBLEM TO BE SOLVED: To obtain the subject composition capable of achieving both a low wear property and a high elongation and useful as a material for molding sliding members such as a non-cut sealing by including a specific carbon filler in a specified amount.

SOLUTION: This tetrafluoroethylene resin composition comprises about 60-95 vol.% of tetrafluoroethylene resin and about 5-40 vol.%, preferably about 20-30 wt.%, of a carbon filler having a specific surface area of $\leq 3 \text{ m}^2/\text{g}$. The components are mixed with a Henschel mixer, etc. The composition is charged into a mold, preliminarily molded with a compression molding machine at a pressure of 49-88 MPa for about 60-150 sec, and subsequently baked at about 350-390 deg.C for about 1-6 hr to provide the product long in life, high in reliability and also stable in incorporability.

AB - J11021407 A tetrafluoroethylene resin(PTFE) compsn.(X) comprises (A)
60-95 vol. % of a PTFE and (B) 40-5 vol. % of a carbon filler having a
specific surface area(SSA) of less than 3 sq.m/g. (X) is used for
sliding part-forming material.
- ADVANTAGE - (X) has a low coefficient of friction and a high
elongation.
